Fuel
Clear and Flexible Reporting

Enhance your data visualization with the Fuel Chart: clear, consistent, and equipped with traffic light indicators for quick insights. This tool ensures your reports are both informative and visually appealing.

PRODUCT OVERVIEW

The Fuel Chart is a versatile **business reporting tool designed to enhance clarity and consistency** by adhering to International Business Communication Standards (IBCS). It features scalable bars, a traffic light performance indicator, and extensive customization options, making it ideal for clear, concise, and tailored data visualization. Perfect for professionals looking to **improve the effectiveness of their reports.**

HOW DOES IT WORK?

Data is first imported and formatted according to IBCS standards for consistency. Bar scaling is then adjusted to ensure clarity, and a traffic light indicator is added for quick performance assessment.

ADDITIONAL FEATURES

Data Export Options: Export the chart to pdf for easy sharing

Scale Bars: For adaptive display of fuel levels, either individually scaled to use full space or uniformly scaled by the highest fill level

Traffic Light: Visually indicates fuel performance levels

Supported Platforms:

- MicroStrategy Dossier/Library/Mobile
