# Graph

Turn complex datasets into clear insights

Simplify your data with the Graph visual's "rest bar," which consolidates minor values, and the "Total bar," which provides an overview of all values. This IBCS-compliant tool **ensures reports are clear and visually appealing**, perfect for both detailed analysis and high-level summaries.

PRODUCT OVERVIEW

Following **IBCS standards**, this tool delivers structured and visually engaging reports. Key features include the "Rest bar" for merging smaller data points and the "Total bar", for quick summaries. Additional charts, like deviation and waterfall charts, further enhance your data analysis.

HOW DOES IT WORK?

The Graph visual's **user-friendly interface allows extensive customization**. Supplementary charts can be overlaid on the main bar chart for richer analysis. The "Rest bar" keeps extensive datasets readable, while the "Total bar" provides an immediate total data overview.

ADDITIONAL FEATURES

IBCS-Compliant Formatting: Ensures clear consistent reports

Supplementary Charts: Add depth with bar, whisker or waterfall charts that show the deviation

Rest Bar: Consolidates minor data points for readability

Total Bar: Provides a total bar for each metric.

Customizable Aesthetics: Adjust color and text style to fit the style of your report

Supported Platforms:
