

# Stacked

**Achieve Clarity and Versatility**

The Stacked Chart Visual is designed to enhance data presentation by offering extensive customization options and presets that adhere to the IBCS standard. It is suitable for a variety of business reporting and analysis scenarios.

## PRODUCT OVERVIEW

The Stacked Visual enhances business reporting by adhering to IBCS standards, ensuring **clear and consistent data presentation**. Users can combine stacked and non-stacked bars for a detailed view and calculate deviations between metrics to identify trends and discrepancies. **Extensive customization options** for colors, text styles, and functional configurations make this visual both informative and tailored to specific analysis needs.

## HOW DOES IT WORK?

Add data into the Stack Chart Visual interface. Users can **choose the orientation that best suits their needs**, either horizontal or vertical. The chart allows **combining stacked and non-stacked bars** for a detailed view and includes the ability to calculate deviations between metrics to identify trends and discrepancies. Customization options are available to adjust colors, text styles, and other elements to match specific requirements. Use the PDF export function to download the the visual for easy sharing and presentation.

## ADDITIONAL FEATURES

**IBCS Compliance:** Adheres to International Business Communication Standards for clear and consistent data presentation.

**Deviation Calculation:** Enables calculation of deviations between metrics to identify trends and discrepancies.
