

Waterfall

Effortlessly Customize, Clarify and Compare Your Data

The Waterfall chart is designed to enhance data presentation by offering flexible orientation and extensive customization options. It is **ideal for various reporting and analysis scenarios**.

PRODUCT OVERVIEW

The Waterfall chart is a versatile tool that offers flexible horizontal or vertical orientations, making it **easy to customize, clarify, and compare data**. It breaks oversized bars for better readability, displays best and worst-case scenario lines for performance evaluation, and provides extensive customization options to suit both style and functionality.

HOW DOES IT WORK?

The process begins by inputting data into the Waterfall chart interface. Users can then choose the orientation that best suits their needs. The chart allows for **breaking oversized bars to maintain readability** and includes lines for best and worst-case scenarios to aid in performance evaluation. Customization options are available to adjust colors, fonts, and other elements to match specific requirements. For easy sharing and presentation the visual can be exported into a PDF file.

ADDITIONAL FEATURES

IBCS-Compliant Formatting: Ensures clear consistent reports.

Flexible Orientation: Adjust the chart's orientation to best fit your report layout.

Use first and last metric value as start and end bar.

Target Values: Displays lines indicating the best case and worst case scenario

Supported Platforms:

- MicroStrategy Dossier/Library/Mobile
