

DYNAMIC ICON VISUAL

Visualize your data with intuitive icons and make your report stand out

Enhance your reports with intuitive, data-driven icons. The Dynamic Icon visual transforms numerical values into clear visual signals, enabling faster understanding and better decision-making.

VISUALIZE YOUR DATA WITH DYNAMIC ICONS

Enhance your reports with intuitive, data-driven icons. The Dynamic Icon visual transforms numerical values into clear visual signals, enabling faster understanding and better decision-making.

HOW DOES IT WORK?

Dynamic Icon uses conditional logic to map your data to specific icons. Based on defined rules, the visual updates automatically as your data changes.

- Define conditions based on measures or values
- Assign icons to specific thresholds or states
- Display results instantly within your report

This enables a highly responsive and interactive reporting experience.

KEY CAPABILITIES

- Conditional icon logic based on data values and measures
- Extensive and customizable icon library
- Real-time updates based on data changes
- Seamless integration into existing Power BI reports
- Clean, responsive, and performance-optimized design

WHY USE DYNAMIC ICON?

Traditional reports rely heavily on numbers, which can slow down interpretation. Dynamic Icon simplifies data consumption by translating values into intuitive visuals.

- Faster insight recognition
- Improved report usability
- Enhanced communication of key metrics
