

Landing Page Visual

Create a centralized hub for your entire Power BI ecosystem

As Power BI environments grow, “where can I find report X?” becomes a real support cost. Landing Page turns dozens of workspaces into one structured, professional portal.

Why Landing Page?

A dynamic, box-based dashboard puts favorites and global links front and center, while a tree-based Hierarchy Explorer with search makes any dataset or dashboard easy to find — all wrapped in your own corporate branding.

What's included

Core capabilities plus the details that show up once you're deep in analysis.

Customizable Dashboard

A box-based home screen with favorites and global external links like your intranet or SharePoint.

Smart Content Grouping

Reports and datasets organized by department or project, so users see only what's relevant to them.

Advanced Hierarchy Explorer

Tree-based navigation of every workspace, with integrated search and filtering.

Integrated Administration

Manage user access, report groups, and global links directly inside the visual.

Corporate Branding & UI

Colors, icons, and logos fully customizable to match your corporate identity.

Lower Support Load

Fewer “where do I find X” questions, and a single entry point for every business-relevant report.

Platform

Certified visual for Power BI
