

Smart Table Visual

A high-performance, IBCS-compliant table visual for Power BI

Standard Power BI tables weren't built for financial reporting. Smart Table brings IBCS-standard formatting, in-cell microcharts, and pixel-perfect layouts to even the densest report.

How it works

Smart Table automatically recognizes Actual, Budget, and Forecast categories and applies standardized IBCS fills, patterns, and scenario markers, so every stakeholder reads the report the same way — without a legend.

Q1				Q2		
	Revenue	Cost	Profit	Planned Revenue	Variance vs Plan	Forecast Revenue
Totals	1,037,940	1,127,720	-89,775	1,340,356	-302,416	1,354,316
Q1 Operations Europe	295,536	240,671	54,865	299,253	-3,717	293,097
Q2 Sales Europe	243,798	300,903	-56,105	379,353	-134,555	363,553
Q2 IT Europe	185,869	180,377	5,492	204,144	-18,475	199,671
Q1 Sales Europe	181,359	276,701	-95,342	315,536	-134,180	327,447
Q2 Operations Europe	171,584	138,069	33,515	143,067	28,517	136,567
Real	633,176	855,426	-222,250	1,145,396	-512,220	1,148,500

What's included

Core capabilities plus the details that show up once you're deep in analysis.

IBCS Compliance by Design

Standardized fills, patterns, and scenario markers (AC, PL, FC, PY), applied automatically.

Integrated Microcharts

Bar charts and sparklines live directly inside table rows for extra data density.

In-Cell Deviation Analysis

Absolute and relative variances are visualized right where the numbers are.

Pixel-Perfect Precision

Fixed column widths and row heights keep even thousand-row hierarchies crisp and aligned.

Custom Signal Colors

Define your own color palettes to flag risks and opportunities at a glance.

Full Brand Alignment

Fonts, colors, and backgrounds are fully customizable to match your corporate identity.
